TECHNICAL SERVICES ADVISORY MEMO #

TO: Distribution
FROM: Technical Services
DATE: May 23, 2012
SUBJECT: Electronic controller update: Hot Food Displays.

Remarks: **For your review**

Effective May 7, 2012 SandenVendo America implemented a new electronic controller in all Hot Food Displays to provide the following enhancements:

Faster programming

Maximize temperature set points up to 255 degree F.

Upgraded programming buttons

Adjustable timers in 30 minute increments from 1 to 4 hours.

USB drive programming capability including upgradable default temperature and timer set points plus future firmware updates if required.

Improved ribbon cable design eliminating the possibility of kinked cables during servicing.

Improved harness connections.

To insure controllers are being sent out to the proper default settings we are releasing three new controller part numbers:

All HFD models will use: 1201293

All HFDM or Mini HFD will use: 1201293-1

All HFDC or Combo Serve HFD will use: 1201293-3

HFD model numbers with the new controller will change as follows:

HFD000004 changes to HFD000006

HFD000005 changes to HFD000007

HFDM00001 changes to HFDM00002

HFDC00001 changes to HFDC00002

New controllers will retrofit current units using our controller wire kit #1207105.

Installation instructions can be found on our web site: www.vendoco.com

If you need further information or assistance, please contact SandenVendo Technical Services at **800-344-7216, Ext. 9935.**
