

V21i, IoT Vendor

Our industry leading V21 beverage vending machine is now also available as the “V21i”.

It is ‘i’ntelligent, ‘i’ntuitive and all ‘i’nclusive.

Equipped with an intuitive user interface on a 32" touch screen, V21i utilizes a media management system to generate advertising revenue in addition to product sales.

V21i accepts all forms of digital payments and is fully integrated for touchless vending with your mobile phone by QR Code, app or app-less.

The smart software helps you track your machine, provides efficient route management, and can even predict customer demand.

The machine's monitoring system has email capability for instant alarms and notification to reduce downtime. Its intelligence can build its own predictive error analysis to prevent future machine malfunction.

Optional advanced features include beacon capabilities, GPS module and network capability.
